

Dear SEPTA Board Members:

**As SEPTA's riders, workers, and neighbors, we call on you to cancel plans to build a natural gas power plant in the Nicetown section of North Philadelphia.** The plant would release toxic pollution that would harm the health of community residents, SEPTA employees, and students and teachers at nearby schools. In addition, the plant would lead to more global warming, and it would waste money. We urge SEPTA to begin switching to clean renewable energy instead!
